Ashish sankpal

Summary

Bachelor's in **Computer Engineering** with Versatile Experience as a Software Developer to build, develop, deploy and deliver some successful projects and scale the growth of Organization. Major responsibilities include Client Interaction, Co-ordinating with Stake Holders (Internal and External), Requirement gathering, analyzing datasets, Development, Deployment reporting and documenting new features for the Project. Committed to furthering a career in Business Planning, Delivering and Project Management

Professional Summary

- **React.Js Expertise:** Accomplished React.js developer with good experience, specializing in building dynamic and responsive user interfaces. Proficient in creating reusable components and maintaining state management for complex web applications.

- **Node.js Developer:** Proficient in Node.js and its frameworks, with a strong background in server-side development. Experienced in building scalable and efficient server-side applications, handling asynchronous operations, and optimizing performance.

- **Full-Stack Development:** Adept at full-stack development using React.js for the front end and Node.js for the back end. Skilled in integrating these technologies to create robust, end-to-end web applications.

- **Client-Centric Approach:** Demonstrated ability to understand and translate client requirements into technical specifications, ensuring the delivered product aligns seamlessly with client expectations.

- **Strong Communication Skills:** Excellent communication skills, both verbal and written, facilitating clear and effective communication with team members, clients, and stakeholders.

- **State Management:** Expertise in state management libraries such as Redux and Context API. Capable of effectively managing the state of large-scale applications, ensuring data consistency and smooth user interactions.

- **Responsive Design:** Proficient in creating responsive and mobile-friendly web applications using CSS frameworks like Bootstrap and media queries. Ensures optimal user experience across different devices and screen sizes.

- **Testing and Debugging:** Experienced in writing unit tests and performing debugging to ensure the reliability and stability of applications. Skilled in using testing frameworks and tools to identify and fix issues promptly.

- **Continuous Learning:** Enthusiastic about learning and adopting new technologies and tools. Stays updated with the latest trends in web development and incorporates innovative solutions into projects.

- **Problem-Solving:** Proven ability to analyze complex problems, devise creative solutions, and implement effective strategies, ensuring the successful completion of projects within specified timelines.

Education

B.E. (Computer Engineering)
- **1ST** Class CGPA from University of Mumbai   Aug/2020

Certification and Achievements

- Completed an intensive and comprehensive certification program of **Full Stack JavaScript Developer** covering both frontend and backend JavaScript technologies.   Jan-Feb/2021
- Recognized as the **Golden Employee of the Year in 2023** for exceptional dedication, outstanding performance, and significant contributions to WE3.TechWorks.

Professional Experience

ReactJs Developer

We3 Tech Works • Mumbai, Maharashtra   03/2021 – 09/2021
Client Name – Mangal Keshav Financial Services LLP
Module - mKYC
Link - https://mkyc.mangalkeshav.com/kyc

- Developed and worked on eKYC and trading web Aplication in React Js with Material UI, Redux and Some modules in Typescript.
- Handling and Binding REST API's and with React Framework. Handling Response, Calling Rest APIs, Error Handling and Validation of the Web Application.
- Experience working with Bootstrap, Chakra UI, MUI and lot more Responsiveness of the web application Implemented Input.
- Model Validation,Data Sanity from UI.
- Integrated 3rd party JS bundles and SDK for using their Services e.g. Digio,RazorPay Payment Gateway , NSDL eSign Authentication and Implementation.
- Developed Rest API in .Net core and binded with front end application in React. Build some modules in typescript.

ReactJs Developer

We3 Tech Works • Mumbai, Maharashtra   09/2021 – 06/2022
Client Name – Motilal Oswal Financial Services LLP
Module - EKYC
Link - https://www.motilaloswal.com/open-demat-account/

- Developed and worked on Motilas Oswal's eKYC (Electronic Know Your Client) and express (Motilal's franchise Clients).
- Developed this Ekyc from scratch to cutting edge module with API Integration and UI/UX part bindling.
- Handling and Binding REST API's through nodeJs calling and handling their response through redux and thunk.
- Gathering requirement about the changes and maintainence and done those changes on daily.
- Intergrated 3rd party JS and SDK's for using their services eg, Digio, RazorPay, GTM, CleverTap, also do Error Handling and Validation of the Web Application.
- Enhancing code quality and solving issue is major part of works.
- Perform sanity and unit tesing after the development. Guided and Mentored Junior React Js Developers for Developing and Designing SPA Web Application in ReactJs.

Software Developer

We3 Tech Works • Mumbai, Maharashtra   07/2022 – 02/2023
Client Name – Motilal Oswal Financial Services LLP
Module - EKYC for Franchise and Retail
Link - https://ekyc.motilaloswal.com/partner

- Spearheaded the design and development of the eKYC module using React.js for the front end and Node.js for the back end. Collaborated closely with UX/UI designers to create an intuitive and user-friendly interface for seamless customer onboarding.
- Developed responsive user interfaces utilizing React.js, ensuring a consistent and engaging user experience across various devices and platforms. Implemented dynamic form components and data visualization elements crucial for capturing and displaying customer information securely.
- Integrated third-party identity verification services and APIs into the eKYC module, allowing seamless verification of customer-provided documents and information. Implemented error handling and fallback mechanisms to ensure uninterrupted service even during service provider downtimes.
- Effectively managed application state using Redux, ensuring consistent data flow and centralized state management.
- Actively involved in identifying and resolving technical challenges, both independently and through collaborative problem-solving sessions with team members.
- Maintained comprehensive documentation of the eKYC module, including system architecture, API endpoints, and data flow diagrams.

Software Developer

We3 Tech Works • Mumbai, Maharashtra   02/2023 – Present

Client Name – Motilal Oswal Financial Services LLP

Module – International EKYC for NRI

Link - https://ekyc.motilaloswal.com/nri

- Collaborated with business analysts and stakeholders to gather and analyze requirements specific to the NRI eKYC module.
- Led the front-end development efforts using React.js to create responsive and user-friendly interfaces for the NRI eKYC platform. Implemented complex user interactions, dynamic form components, and data visualization elements crucial for efficient onboarding of non-resident clients.
- Worked closely with the back-end development team to integrate front-end components with RESTful APIs built on Node.js
- Integrated third-party services and APIs for identity verification, document validation, and compliance checks within the eKYC process.
- Conducted regular performance assessments of the front-end code. Implemented code splitting, lazy loading, and optimized rendering techniques to enhance application speed and responsiveness, ensuring a seamless user experience.
- Participated in regular code review sessions, providing constructive feedback to peers and incorporating best practices.

Personal Projects

- Shopzilla (E-commerce)
- Retail Web portal

Skills

- JavaScript
- ReactJs
- NodeJs
- TypeScript
- HTML
- CSS, SCSS, Bootstrap
- jQuery
- NPM, Babel ,Figma, Slack
